Discovery Assessment Services

Our Discovery Assessment Services (DAS) provides expert business process management consulting for companies. We align with the highest standards and best practices in the industry to ensure effective improvement in the areas that need attention. With the guidance of our experts, the digital transformation of your business processes has an assured path to success.

## How does it work?

Our approach is based on your company's needs, vision, and goals, as well as its priorities. We conduct an in-depth analysis of the processes to be evaluated: process documentation, operational performance, identification of bottlenecks, among others. In this way, we identify improvement opportunities and align them with your specific use cases.

Our team of experts will deliver the necessary improvements to optimize your company's operational processes. Further, we will provide advice for the effective implementation of solutions that address the identified pain points.

An action plan is designed to organize all aspects, from top priority to desirable but non-essential elements. This plan is developed in phases and supported by the necessary tools for continuous improvement, with the goal of achieving digital transformation safely and successfully.

# How do we do it?

## Support sessions

Our consultants will be with you at every stage of the process, from the initial exploration to consultations with the team in charge of the processes to be evaluated.

## Extensive documentation

For each phase of the consulting process, we provide complete documentation that you can share with your entire team, ensuring transparency and common understanding.

## Service proposal and staged project plan

Our goal is to adapt to your needs, priorities, and budget. That's why we offer you a customized service proposal and phased planning to ensure a successful investment.

## Post-production Care (PPC) service proposal

At GB Advisors, we value long-lasting relationships. That's why, after implementation, we offer post-production care services to ensure a healthy and continuous lifecycle to your company's digital transformation.

# Timeline

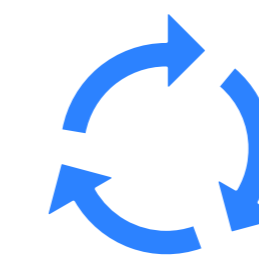

## 1. Introspection

We carry out an introspection activity to determine what we need to improve about the critical points discovered.

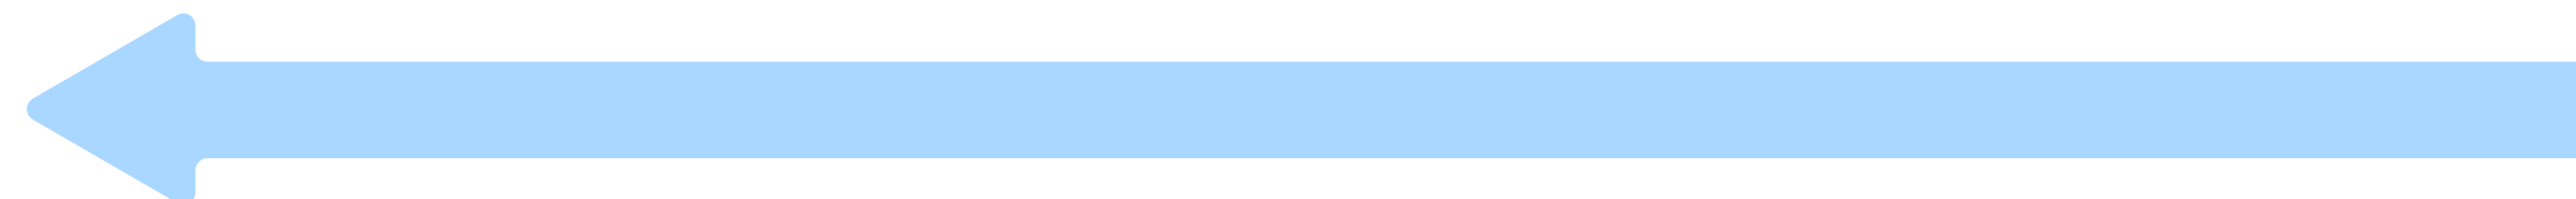

## 2. Transformation

We conceptualize the activities and priorities to be executed to achieve effective improvement of the areas involved.

## 3. Continuous evolution

We evaluate the ideal technological solution that responds to the needs of your company, ensuring the scalability of the digital transformation and thus continuous improvement.

## What value do I get from this?

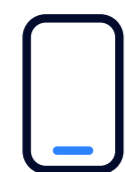

- ✓ **Increased productivity and cost reduction:**  
This service allows your company to automate processes and reduce errors, increasing operational effectiveness.
- ✓ **Improved decision-making process:**  
Collect and analyze data in real time to enable a decision-making process based on consistent and accurate information.
- ✓ **Enhanced customer service quality:**  
Personalize your customers' experience to increase their satisfaction and earn their loyalty to your brand.
- ✓ **Business agility:**  
Enable your company's quick and agile adaptation to market changes and foster the ability to innovate in an effective and timely manner.
